COMP/ENGN 4528/6528: Computer Vision

Question 1   **Environment setup**

1. Please refer to the Python environment setup instructions on Wattle. It's essential to install the environment correctly, as you'll be using it frequently in labs and assignments.

2. If you have any questions, please feel free to ask your tutor for help!

Question 2   **Programming introduction**

1. Open the "python" folder, and execute the Jupyter Notebook files. Take some time to compare the generated output to your initial expectations and try to comprehend what each line of code does.

2. If you face any kind of problem, you can discuss it with classmates around you or seek assistance from tutors!
